About Cesaroni Technology Incorporated

Cesaroni Technology Incorporated (CTI) is an innovative company specializing in industrial design and manufacturing. Our expertise spans research and development across four core business units:

- Ammunition component manufacturing for military and law enforcement.
- Rocket and missile propulsion system development for aerospace applications.
- Polymeric heat exchange systems for diverse industrial uses.
- Automotive test system integration for precision testing and diagnostics.

Position Overview

Cesaroni Technology Incorporated (CTI) is seeking a detail-oriented Quality Control Inspector (QC- Manufacturing) to inspect injection-molded components and ensure products meet established quality and dimensional requirements. The successful candidate will work closely with the manufacturing team to identify defects, perform measurements, and document inspection results.

Key Responsibilities

- Perform visual, dimensional, and in-process inspections of injection-molded components, machined metal parts, and stamped metal parts.
- Conduct first-piece, in-process, and final inspections in accordance with established inspection procedures.
- Measure and verify component dimensions using precision measuring instruments, including calipers, micrometers, gauges, and related inspection equipment.
- Interpret engineering drawings, specifications, tolerances, and inspection criteria.
- Identify, document, and segregate non-conforming products.
- Complete inspection reports and maintain accurate quality and traceability records.
- Support investigations into product defects and manufacturing quality issues.
- Verify that inspection equipment is maintained and calibrated as required.
- Follow established Quality Management System (QMS) procedures, work instructions, and quality standards.

Qualifications & Skills

- 1–2 years of experience in quality inspection, quality control, in a manufacturing environment.
- Post-secondary education in Quality Assurance, Manufacturing, Engineering Technology, or a related field is an asset.
- Experience with injection molding or plastic components is an asset.
- Proficiency with precision measurement equipment and inspection tools.
- Ability to read and interpret engineering drawings and dimensional tolerances.
- Strong attention to detail and analytical skills.
- Strong written and verbal communication skills.
- Proficiency with Microsoft Office, particularly Excel.
- Experience working within an ISO 9001-certified environment is an asset.
- Ability to work independently and effectively in a production environment.

What We Offer

Cesaroni Technology Incorporated offers competitive compensation and a comprehensive health and benefits package, including dental, extended health care, life insurance, vision care, paid time off, and an RRSP matching program. Employees also have the opportunity to participate in company events and team activities within a professional and collaborative work environment.

Additional Information

Cesaroni Technology Incorporated is committed to a fair and accessible recruitment process. *No artificial intelligence (AI) is used to screen or filter applicants. All applications are reviewed by members of our recruiting team.*

- * Hiring for a vacant position.
- * Candidate must have reliable personal transportation to and from the Gormley facility.
- * Candidate must be able to successfully complete a police background check required for CGRP clearance.

How to Apply

Please apply through [Indeed](#) with your current resume.

The posting will be open until the position is filled.

We thank all applicants for their interest in Cesaroni Technology Incorporated. Due to the volume of applications received, only candidates selected to proceed to the interview stage will be contacted.

Candidates selected for an interview can expect to be contacted within approximately 1–3 weeks of the posting date.

We appreciate the time and effort taken to apply and thank all candidates for considering a career with Cesaroni Technology Incorporated.
