Cesaroni Technology Incorporated Achieves ISO 9001 Quality Management Systems Certification (QMS) From NSF International Strategic Registrations (NSF-ISR)

ISO 9001 certification demonstrates Cesaroni Technology's commitment to quality.

Gormley, ON, April 18, 2024 – Cesaroni Technology Incorporated has achieved ISO 9001 Quality Management Systems certification from [NSF-ISR](#), an NSF company. The standard helps organizations reliably meet the needs of clients in both the delivery and continuous improvement of products and services.

Cesaroni Technology Incorporated (CTI) is a global company dedicated to aerospace and defence manufacturing, displaying decades of experience and a proven track record of delivering innovative solutions. Specializing in ammunition components, aerospace propulsion systems, and polymeric heat exchange technology, CTI has established itself as a leader in the industry, consistently exceeding client expectations and driving excellence.

"In achieving ISO 9001 certification, Cesaroni Technology Incorporated underscores its unwavering commitment to quality and customer satisfaction. This milestone not only validates our dedication to continuous improvement but also reinforces our position as a trusted partner in the industry," said Mark Nepirly, Vice President and Chief Operating Officer at Cesaroni Technology Incorporated.

ISO 9001 is based on quality management principles such as strong customer focus, the involvement of top management, the process approach, and continual improvement. Certification to ISO 9001 helps companies provide consistent, quality products and services.

"Through certification to ISO 9001, Cesaroni Technology Incorporated is able to not only improve their products, process, and service quality but also reduce waste," said Sameer Vachani, Senior Director of NSF-ISR. "This shows Cesaroni Technology Incorporated's commitment to improving their business and meeting customer expectations globally."

The ISO 9001 standard focuses on performance through a combination of risk-based thinking and a process approach, as well as the employment of the "plan-do-check-act" cycle at all levels in the organization.

Moving forward, CTI remains committed to upholding the ISO 9001 standard, leveraging risk-based thinking and a process approach to drive performance and ensure customer satisfaction at every level of the organization.
